

Design Template

To help get your WebBuilder up and running, we can create certain elements of your site that need design input for you. We have set out guidelines below so we can create these elements quickly and efficiently to get your site up quicker.

Element 1: Header Bar This is a bar that goes across the top of your web page we will need the following information from you to create this:

- Company Logo.
- Telephone Number.
- Company slogan/motto (this can be left out if need be).
- Any graphic/image that you would like to add
- Pantone colours for background (standard is white).
- Colour scheme.

Header Bar Image: (1000 x 110)px:

Element 2: Link Buttons These are the external link buttons that when pressed will take your Customer to different pages within your website or to external places such as Facebook, Twitter or Specialist Skin Site; you choose where they point. We will need the following from you to create the design for these.

- 6 buttons headings i.e. Facebook, Golf Catalogue, Register now etc
- Colour of the buttons.
- Any product images that you would like to add to any of these buttons

3: Flash Banner this is an animated piece that changes dynamically on your website. In this you can add whatever pictures or products you would like coupled with text to give your page a dynamic display. Flash is quite versatile in that you can also have video displayed there to. We will need the following from you to create this flash banner.

- Provide us with the pictures you would like to use in the 4 flash presentation images, these need to be high resolution.
- Provide us with the text for each of the 4 flash presentation images (for example this could be: 'Free origination on orders over a certain amount', or 'seasonal offers/information')
- Provide us with the colour you would like to use on the back ground.
- Tell us where you want to flash situated on the website so we can design according to those dimensions.

Flash Banner: (optimum width 1000px)

Once we have received all these elements then we will commence the design process and you will have the completed elements within 48 hours.
